

I apologize in advance for the fact that my comments will not be very polished; I work with computers, not with people. In Columbus, we have a newspaper I refuse to read because the news it contains is presented with a bias. I believe there will never be enough media that all positions will get a fair shake; and with your commission's repeal of the Fairness Act (1985) combined with the action to limit media, you are guaranteeing that our media will ultimately only present a single point of view; one that does not represent the selflessness of the majority of Americans, but the selfishness of some guy from Austrailia.
